

CATS

WELLNESS PLANS

MATURE ADULTS: 7 - 10 YEARS

Preventative health care so they can do what they love for longer, without breaking the bank. This plan includes routine screening so we can start trending kidney and thyroid function, among other parameters, to help us detect early disease processes and intervene faster.

Our plan includes:

- Annual exam (x1)
- Core vaccines
- Basic oral deworming (x1)
- One free drop-off visit
- Blood pressure check (x1)
- Wellness blood work (x1), including CBC, mini chemistry, thyroid testing
- Urinalysis (x1)
- Fear Free medication
- Nail trims during exams

Upfront yearly fee:

\$122.50+HST

Monthly fee:

\$46.89+HST

CATS

WELLNESS PLANS

MATURE ADULTS: 7-10 YEARS

Annual exam

- At this life stage, we will focus on early detection of disease, oral health, weight management, and joint health. Signs of early degenerative joint disease can be hard to detect in cats, and we will discuss what to watch for.

Core vaccines

- Vaccines are included, but we will discuss your cat's individual needs.

Nail trims during exams

- Complimentary only for cat wellness plan members.

Basic oral dewormer

- One dose of Strongid-T (pyrantel pamoate) with annual exam.

Urinalysis

- This panel includes urine testing to assess your cat's urine concentration (too dilute can suggest early kidney disease; too concentrated can lead to urine crystals), and to check for excess white blood cells, red blood cells, bacteria, crystals, protein, glucose, or ketones, any of which may be present when there is underlying disease.
- **One (1)** test is included per year.

Blood pressure assessment

- Hypertension can be associated with kidney disease, hyperthyroidism, and heart disease.
- Older cats are prone to hypertension but the signs are often missed or associated with "slowing down".
- Hypertension is treatable!
- **One (1)** check included per year.

CATS

WELLNESS PLANS

MATURE ADULTS: 7-10 YEARS

Blood work

- Age-appropriate blood testing is included in this panel. This helps us screen for diseases like kidney disease and hyperthyroidism, making it easier for us to intervene earlier. It also provides us with useful baseline data that we can compare to in the future!
- The included blood work panel (**ONE / 1 per year**) includes:
 - A **biochemistry screen** that looks at kidney values, liver enzymes, protein levels, blood sugar, and electrolytes (sodium and potassium).
 - **Thyroid hormone (T4)** assessment for hyperthyroidism screening
 - A **complete blood count (CBC)** to check for anemia or changes in white blood cell or platelet counts.
- If abnormalities are noted and follow-up testing or treatment is required, **additional tests and treatments are not included in the plan.**
- **Not all diseases can be found with blood work.**

Free drop-off exam

- Worried your cat is unwell? **ONE (1)** free drop-off exam is included.
- Please **call us first** to arrange a time for drop-off, to minimize the time your pet spends waiting to be seen.
- A team member will speak with you to gather more information about your concerns, and then a veterinarian will examine your cat and call you to discuss the next steps. You must be easily reachable by phone.
- The exam fee is included but if any medications or diagnostics are needed, they will cost extra.

WELLNESS PLANS

MATURE ADULTS: 7-10 YEARS

Fear Free medication

- One refill of Fear Free medication (ex. gabapentin) is included with all exams for pets on wellness plans, for stress-free vet visits and medical care!
- Pre-visit calming medication helps **reduce the stress of travel and veterinary visits**, makes your pet feel more **relaxed and comfortable** while at the clinic, and makes it easier to perform a **complete and thorough assessment**.
